

JR

1.5" NPT

Light and easy to handle, this basic projector features an intuitive quick release mechanism and three points of adjustment for pitch and roll. These features, along with plenty of room for cord management, make installation fast and dependable, especially for the smaller, lighter projectors.

■ **Installation**

1.5" NPT compatibility, two-piece design, and adjustment points enable a quick and easy installation.

■ **Universal**

Universal Design fits hole patterns up to 430MM diameter. Legs are pre-assembled for quick attachment to the projector.

■ **Quick Release**

Quick release allows easy removal for bulb replacement without losing picture adjustments.

Load: 50lb
Pitch: +-25°
Roll: +-6°
Yaw: 360°
Diameter: 430mm
Rotation: 360°
Micro Adjust: No

JR2

1.5" NPT

Two-piece design for easy installation via a click-in-place quick release. A total of 12 adjustment points; 6 for pitch and 6 for roll to ensure that projector stays in place and does not slip after installation.

JR3 SyncPro™

1.5" NPT

This top-end projector mount is simply the easiest to install and precisely adjust without the use of tools. Heavy-duty design makes it ideal for larger projectors and/or those with an off-center lens.

■ **Installation**

Simply rotate the large, easy to grip knobs to make all necessary adjustments during installation. Crimson lead screw adjustment mechanism is unique and precise.

■ **Universal**

Universal Design fits hole patterns up to 380MM diameter. Additional legs expand the range to cover any large mounting hole pattern.

■ **Quick Release**

Quick release allows easy removal for bulb replacement without losing picture adjustments.

*Expandable
